ABOUT PLOMBCO

Plombco is a wheel weight manufacturer that has developed the most innovative and comprehensive product lines in the industry. With quality-minded employees, the company produces over one million units per day in its two highly automated facilities. Plombco products are sold to OEM's and aftermarket customers across the Americas, Europe and Asia.

Plombco is also the maker of the patented Plasteel® premium wheel weights for passenger cars and light trucks. Engineered using forward thinking technology, Plasteel® is setting new standards for innovation in the industry.

THE PLOMBCO ADVANTAGES

CUSTOMER SERVICE

Our Customer Service team has over 30 years of experience in the wheel weight industry. We work closely with our customers year round to ensure that we are meeting all their needs. Our team is up for any challenge you may have.

FAST DELIVERY

Plombco is proud to offer our customers a 99.9% fill rate on all orders. Over 95% of all orders are shipped within 72 hours of purchase date.

CUSTOMER EXPERIENCE

Plombco is dedicated to improve customer experience. Our team is concerned every day to finding new solutions for quick & easy balancing. StickPro® wheel weight pre-cleaning wipes, developed by our team, help you achieve that goal every time.

QUALITY

With continuous improvement in mind, our team is making Plombco an ever-improving organization. We believe that people are the recipe for success and a prosperous future. That is the reason why we focus on continuous training to stay on top of the wheel weight market.

MARKETING SUPPORT MATERIAL

To help our clients market and sell our products we offer several tools such as product catalogs, application charts, flyers, rim gauges and product samples. These tools have been designed to contribute to the success of our distributors.

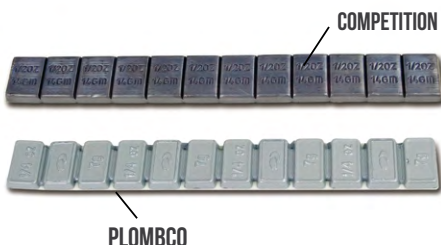

PLASTEEL®

The market is shifting towards lead-free alternatives, and we have listened to the feedback from our customers in the field. Important issues, such as the increased popularity of clad wheels on new vehicles, demonstrated that there is a need for a better alternative than steel or zinc. **Plombco has developed the first ever steel core wheel weight encased in a plastic shell.**

UNIQUE PACKAGING

Our unique and practical packaging is made of high-quality corrugated cardboard and can help you save space in your warehouse. Each case is designed to ship two, four or eight boxes of wheel weights (view page 13).

COATING

We have spent years developing a coating that is compliant with the most stringent automobile manufacturer's requirements. It protects against corrosion, resists discoloration from the sun and car-wash plus much more. In order to keep your car looking good, the color matches most wheels commonly used. **Plombco offers the same top quality finish on all of the coated products.**

ADHESIVE WHEEL WEIGHTS

CHOOSE AMONGST OUR WIDE SELECTION OF ADHESIVE WHEEL WEIGHTS TO FIT YOUR NEEDS

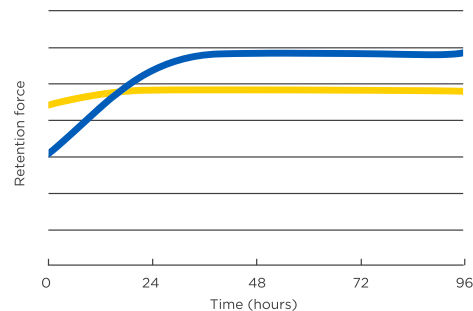

Plombco manufactures a wide range of adhesive wheel weights (steel, lead and zinc) for standard vehicle categories, low-profile and truck wheels.

		Size of the segments	Color			Adhesive		Profile		Packaging

2 ADHESIVE TAPE OPTIONS

Mechanics expect quick and easy balancing every time. Wherever you are located in the world, Plombco has the right type of adhesive to fit your needs. Even the coldest countries can benefit from the advantages of Plombco's adhesive wheel weights. **2 types of adhesive are offered to cover all applications.** Plombco Standard and CW adhesive tapes are made in compliance with Pressure Sensitive Tape Council (PSTC) standards.

Standard	Cold Weather (CW)
For general purpose	Exceptional adherence in cold temperatures, as low as 15°F (-10°C)
White foam carrier	Gray foam carrier
Widely used in North America	Widely used in the colder countries

LEAD ADHESIVE WHEEL WEIGHTS

COATED VS UNCOATED LOOK AT THE DIFFERENCE

All Plombco lead adhesive weights are coated. The coating colour matches most wheels which makes the product very aesthetic. The durable finish of the coating prevents also any colour degradation or change.

YOUR NEW GO-TO PARTNER IN WHEEL WEIGHT PRE-CLEANING

Most of the time, mechanics do not wipe the wheels with a clean soft cloth prior to wheel balancing, resulting in adhesive weights falling off the wheels. For quick & easy balancing, having a clean wheel is the key to success and StickPro® wheel weight pre-cleaning wipes help you achieve that goal every time.

In addition to improving adhesive wheel weight adherence, StickPro® wheel weight pre-cleaning wipes easily cleans the rims and removes brake dust & grease without the need for any use of water. It is suitable for alloy, steel, aluminum, chrome or varnished wheels and even works on plastic wheel covers, when used as directed.

MCPS

1/4 oz to 3 oz

Used on most North American vehicles with alloy wheels

IAWPS

5 g to 60 g

Used on some European and some Asian vehicles with alloy wheels

FNPS

5 g to 60 g

Used on most Japanese vehicles with alloy wheels

ENPS

5 g to 60 g

Used on Mercedes, Audi and Volkswagen. Also used on many aftermarket alloy wheels with thin rim flanges

TPS

1/4 oz to 3 oz

Used on some light trucks and SUV's with alloy or steel wheels

AWPS

1/4 oz to 3 oz

Used on most domestic vehicles prior to 1995 with alloy wheels

VISIT PLASTEELWHEELWEIGHTS.COM FOR
MORE INFORMATION ON THE PLASTEEL® PRODUCT LINE.

STEEL WHEEL WEIGHTS

PFe

1/4 oz to 3 oz
Coated only

Used on passenger vehicles, full size pickups and vans with steel wheels

Note: For applications on full size pickups and vans, we recommend the use of our TPS or TFe series for light truck weights. Use of PFe weights may cause overstressing of the clip resulting in failures.

MCFe

1/4 oz to 3 oz
Coated only

Used on most North American vehicles with alloy wheels

IAWFe

5 g to 60 g
Coated only

Used on some European and some Asian vehicles with alloy wheels

FNFe

5 g to 60 g
Coated only

Used on most Japanese vehicles with alloy wheels

ENFe

5 g to 60 g
Coated only

Used on Mercedes, Audi and Volkswagen. Also used on many aftermarket alloy wheels with thin rim flanges

TFe

1/4 oz to 3 oz
Coated only

Used on some light trucks and SUV's with alloy or steel wheels

LHFe

1/4 oz to 3 oz
Coated only

Used on older Chrysler vehicles with alloy wheels

AWFe

1/4 oz to 3 oz
Coated only

Used on most domestic vehicles prior to 1995 with alloy wheels

LEAD WHEEL WEIGHTS

REGS and REG

1/4 oz to 6 oz
Coated and uncoated

Used on passenger vehicles with alloy or steel wheels. All sizes 1/4 oz and larger feature a 1" wide "V" clip for superior retention strength.

Note: For applications on full size pickups and vans, we recommend the use of our TS series for light truck weights. Use of REG weights may cause overstressing of the clip resulting in failures.

MCS and MC

1/4 oz to 4 oz
Coated and uncoated

Used on most North American vehicles with alloy wheels

IAWS

5 g to 60 g
Coated only

Used on some European and some Asian vehicles with alloy wheels

FNS

5 g to 70 g
Coated only

Used on most Japanese vehicles with alloy wheels

ENS

5 g to 60 g
Coated only

Used on Mercedes, Audi and Volkswagen vehicles. Also used on many aftermarket alloy wheels with thin rim flanges

TS

1/4 oz to 5 oz
Coated only

Used on some light trucks and SUV's with alloy or steel wheels

LHS

1/4 oz to 3 oz
Coated only

Used on older Chrysler vehicles with alloy wheels

AWS and AW

1/4 oz to 3 oz
Coated and uncoated

Used on most domestic vehicles prior to 1995 with alloy wheels

THINK ABOUT LEAD-FREE ALTERNATIVES

Some states, municipalities and companies may restrict the use of lead. Plombco's exclusive Plasteel® offer the best alternative to lead adhesive wheel weights. Please refer to page 14 & 15.

ZINC WHEEL WEIGHTS

REGZS and REGZ

1/4 oz to 3 oz
Coated and uncoated

Used on passenger vehicles with alloy or steel wheels. All sizes 3/4 oz and larger feature a 1" wide "V" clip for superior retention strength.

Note: For applications on full size pickups and vans, we recommend the use of our TZS series for light truck weights. Use of REGZ weights may cause overstressing of the clip resulting in failures.

MCZS

1/4 oz to 3 oz
Coated only

Used on most North American vehicles with alloy wheels

IAWZS

5 g to 60 g
Coated only

Used on some European and some Asian vehicles with alloy wheels

FNZS

5 g to 60 g
Coated only

Used on most Japanese vehicles with alloy wheels

ENZS

5 g to 60 g
Coated only

Used on Mercedes, Audi and Volkswagen. Also used on many aftermarket alloy wheels with thin rim flanges

TZS

1/4 oz to 3 oz
Coated only

Used on some light trucks and SUV's with steel or aluminum wheels

LHZS

1/4 oz to 3 oz
Coated only

Used on older Chrysler vehicles with alloy wheels

AWZS

1/4 oz to 3 oz
Coated only

Used on most domestic vehicles prior to 1995 with alloy wheels
