

Science.
Applied to Life.™

A large, black, sans-serif '3M' logo printed on a brown cardboard box. The box is positioned diagonally across the upper half of the image, resting on a silver, diamond-plate metal surface. A roll of red and black 3M Automotive Attachment Tape is visible in the foreground, partially overlapping the box. A red-handled tool, possibly a screwdriver or a small wrench, lies on the metal surface to the right of the box. The background is a solid yellow color that transitions from the bottom left corner of the image.

Automotive Division

3M™ Wheel Weight System

The 3M™ Wheel Weight System combines conformable wheel balancing material and industry-leading 3M™ Automotive Attachment Tape to provide an all-in-one, securely attached wheel weight balancing system.

Balancing science and responsibility.

Reduced cost of ownership

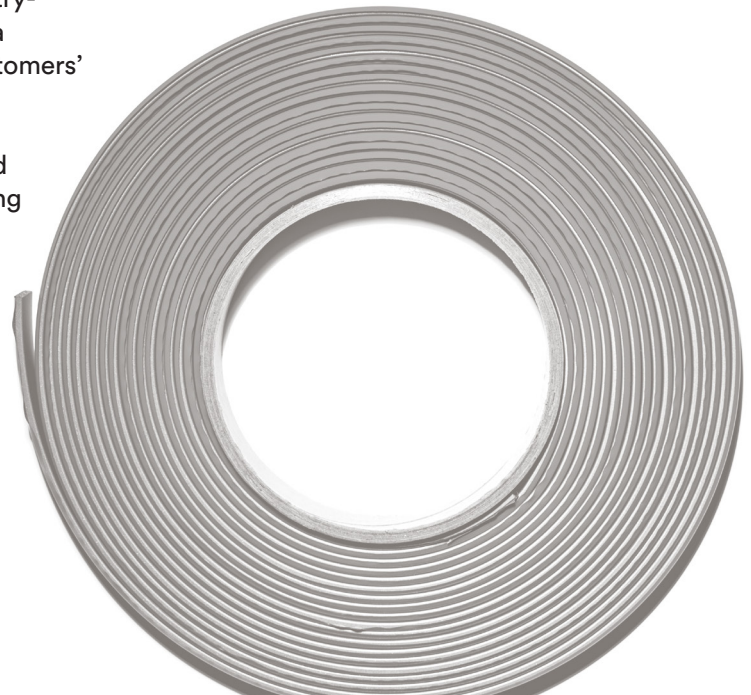

The 3M Wheel Weight material is provided as a roll good designed to be cut to weight. This provides precision balancing, which enables customers to reduce their cost of ownership by eliminating traditional wheel weight inventories of individual part sizes.

Lead-Free, Corrosion-Free Design

Designed to replace environmentally harmful lead wheel weights, corrosion-free 3M Wheel Weights enable maintenance of expensive wheels and enhance overall vehicle appearance.

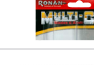

Designed to have less impact on the environment than the industry-standard lead wheel weights, the 3M™ Wheel Weight System is a proprietary product with unique properties built to meet our customers' ever-increasing needs for sustainable, quality products.

The 3M Wheel Weight System consists of a unique, flexible and conformable material available in an easy-to-use, self-dispensing package used with a stand and cutting device.
