### Section 6: Accidental Release Measures

#### PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES

Evacuate area. Ventilate the area with fresh air. For large spill, or spills in confined spaces, provide mechanical ventilation to disperse or exhaust vapors, in accordance with good industrial hygiene practice. Warning! A motor could be an ignition source and could cause flammable gases or vapors in the spill area to burn or explode. Refer to other sections of this SDS for information regarding physical and health hazards, respiratory protection, ventilation, and personal protective equipment.

#### METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING UP

Contain spill. Working from around the edges of the spill inward, cover with bentonite, vermiculite, or commercially

available inorganic absorbent material. Mix in sufficient absorbent until it appears dry. Remember, adding an absorbent material does not remove a physical, health, or environmental hazard. Collect as much of the spilled material as possible. Place in a closed container approved for transportation by appropriate authorities. Clean up residue with an appropriate solvent selected by a qualified and authorized person. Ventilate the area with fresh air. Read and follow safety precautions on the solvent label and SDS. Seal the container. Dispose of collected material as soon as possible.

#### ENVIRONMENTAL PRECAUTIONS:

Avoid release to the environment.

### **Section 7: Handling and Storage**

#### PRECAUTIONS FOR SAFE HANDLING

Keep out of reach of children. Avoid breathing dust/fume/gas/mist/vapors/spray. Do not get in eyes, on skin, or on clothing. Do not eat, drink or smoke when using this product. Wash thoroughly after handling.

#### CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES

Store in a well-ventilated place. Keep container tightly closed. Protect from sunlight. Store away from heat.

### **Section 8: Exposure Controls/Personal Protection**

#### CONTROL PARAMETERS

<b>Ingredients</b>	<b>Exposure Limits</b>
Kerosine (petroleum)	ACGIH TLV (United States). TWA(as total hydrocarbon vapor, non-aerosol): 200 mg/m <sup>3</sup> (Skin Notation)
Petroleum Distillates	Chemical Manufacturer Required Guidelines, TWA:165 ppm

#### ENGINEERING MEASURES

Use general dilution ventilation and/or local exhaust ventilation to control airborne exposures to below relevant Exposure Limits and/or control dust/fume/gas/mist/vapors/spray. If ventilation is not adequate, use respiratory protection equipment.

#### INDIVIDUAL PROTECTION MEASURES

##### EYE/FACE PROTECTION

Select and use eye/face protection to prevent contact based on the results of an exposure assessment. The following eye/face protection(s) are recommended as a good industrial hygiene practice: Wear eye/face protection, Safety Glasses with side shields

##### SKIN/HAND PROTECTION

Select and use gloves and/or protective clothing approved to relevant local standards to prevent skin contact based on the results of an exposure assessment. Selection should be based on use factors such as exposure levels, concentration of the substance or mixture, frequency and duration, physical challenges such as temperature extremes, and other use conditions. Consult with your glove and/or protective clothing manufacturer for selection of appropriate compatible gloves/protective clothing. Wear protective gloves. Gloves made from the following material(s) are recommended: Neoprene.

##### RESPIRATORY PROTECTION

In case of inadequate ventilation wear respiratory protection. An exposure assessment may be needed to decide if a respirator is required. If a respirator is needed, use respirators as part of a full respiratory protection program. Based on the results of the exposure assessment, select from the following respirator type(s) to reduce inhalation exposure: Half

facepiece or full facepiece air-purifying respirator suitable for organic vapors and particulates. For questions about suitability for a specific application, consult with your respirator manufacturer.

#### HYGIENE MEASURES

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.
