

# DN106-(size)

**"Category Top Performer"**

AQL 4  
 100% Latex Free

## Disposable Gloves

Disposable gloves are used in many industries for many different applications. Choosing between nitrile, latex, or vinyl (polyvinyl chloride - PVC) disposable gloves will depend on the application and the budget. Nitrile disposable gloves are the most popular style because they offer great chemical resistance, three times the puncture resistance of latex or vinyl, and great comfort and fit. They are popular in many industries, especially in automotive and janitorial. Latex disposable gloves offer the best fit and feel. They are common in healthcare and paint industries, but due to latex allergies they are often substituted by nitrile styles. Vinyl (polyvinyl chloride) gloves are a low cost alternative and offer a looser fit. Vinyl gloves are popular in the food service industry where many glove changes occur.

Regardless of the type of disposable glove that you choose, differences in glove thickness, cuff length, texturing, and colour will also effect personal protection, ease of use and facility compliance. With our wide variety of disposable gloves available, we make it easy to find the right glove for the job.

## Product Details

Item#	Size	Color	Packaging
DN106-(size)	S,M,L,XL,XXL*	Black	100x10* / 90x10

1000 pieces per carton/\*\*900 for XXL (pieces per box, boxes per carton).  
 Retail packaging

## Construction
