Safety Drum Funnels

Prevent spills when transferring flammable solvents, thinners, oils or paint wastes—self-closing lid in case of fire

- Wide-mouth, galvanized steel with durable powder-coat finish
- Models 08207 and 08205 include a built-in brass flame arrester that absorbs and dissipates heat, preventing any external ignition source from reaching the drum's content. Model 08205 with a longer flame arrester provides greater liquid flow.
- For collection of viscous flammables or non-flammable liquids, use model 08208 fitted with a long open-ended brass tube to direct liquid flow
- Model 08203 prevents spillage from tip-over accidents and offers the same protection as drum funnel 08207 above, but includes an integral self-closing ball valve to prevent content spillage. System includes a brass vent to provide pressure and vacuum relief.
- FM-approved. EPA and OSHA compliant

Proper bonding and grounding techniques prevent static discharge and the potential for fire.

Pushing down handle opens ball valve to release liquid into drum.
