Checkpoint

TRUCK STUD AND HUB CLEANING TOOL MSH-C2

- The toughest 2in1 stud and hub cleaning tool for medium and heavy trucks on the market.
- Heavy-duty stainless-steel brushes easily remove rust and corrosion from the studs.
- Long lasting abrasive pad cleans up to 300 truck hubs.
- Made in one-piece. No replacement parts required. No parts falling off.
- Removes rust from the rotor, drum brake, hub and studs without damaging the surface.
- Compatible with 1/2" impact wrench.

**NO MORE PARTS
FALLING OFF**

**The Checkpoint Cleaning Tool
will last way longer than
anything else on the market.**

The Checkpoint Stud and Hub Cleaning tool quickly and effectively removes rust, corrosion and dirt from medium and heavy trucks' rotor, drum brake, hub and studs. This helps to ensure the secure fitment of wheels and wheel nuts to minimise the risk of a wheel detachment. It also prevents the hub from running off center leading to vibrations, accelerated wear and tear on bearings and other components.
