SAINT-GOBAIN®

THE NEW “QUICK” IN QUICK-CHANGE DISCS

QUICK INITIAL CUT, FINISHING, AND CHANGEOVERS

Fast initial cut and the staying power to provide excellent finishes on hard-to-grind materials like titanium. What more could you ask for in one disc line? Our new Norton R464 silicon carbide quick-change discs really are a problem solver, on metal fabrication, welding, and MRO applications, as well as the more demanding precision needs of aerospace. Try the entire line: extra sharp P-graded 36 grit through finer finishing P-graded 120 grit.

SAINT-GOBAIN®

R464 SILICON CARBIDE QUICK-CHANGE DISCS

WHY BUY NORTON R464 DISCS VS. THE COMPETITIONS' SILICON CARBIDE DISCS

Competitive Discs

- Most competitive silicon carbide quick-change discs have a lighter, X-wt. cotton backing without any anti-static coating

Norton R464 Discs

- Achieve fast initial cut and the staying power to provide excellent finishes on hard-to-grind materials like titanium with our sharp P-graded silicon carbide abrasive
- Our anti-static coating ensures cool cutting on non-ferrous materials
- Minimize changeovers with long life provided by our durable Y-wt. polyester backing
- Typical results for Norton vs. incumbent silicon carbide discs at two aerospace accounts: the Norton R464 P60 grit discs lasted 30% longer than the incumbent disc on titanium material
