

Pre-Treatment Cut Thru Wipes

Ready-to-use on metal for excellent adhesion and corrosion protection

Pre-Treatment Cut Thru Wipes are pre-saturated, ready-to-use, disposable wipes that advance adhesion and improve corrosion protection on bare metal surfaces.

When applied, they are quick to dry and offer great coverage over medium to large areas, providing better adhesion and corrosion protection for any paint system. Easy to wipe onto steel, galvanized steel, and aluminum, the single-application wipes substitute the use of wash primers, etch primers, and epoxy primers for a speedy repair. Each wipe comes packaged individually in an easy-to-dispense carton of 24 wipes.

- Can be used on all metal surfaces
- For use on medium to large areas requiring no preparation
- Substitutes the use of wash primers, etch primers and epoxy primers
- Compatible with all paint systems
- Easy to dispose once the wipe is dry
