FIX-A-THRED®

Whether it's repairing spark plug port threads, manifolds, oil pans, oxygen sensors or any other aftermarket repair application, Fix-A-Thread® repair products can tackle most any challenge.

Fix-A-Thread kits' stainless steel inserts set the standard for rugged durability and product quality. Ideal for automotive, truck, motorcycle, marine, snow mobile, lawn and garden equipment and more, the Fix-A-Thread product line is built for ultimate strength, easy installation, reliability and versatility.

The spring-like design of the insert spreads the load over the entire bolt and the hole, reducing stud fracture and increasing holding or pull-out strength.

How Fix-A-Thread® Works

Fix-A-Thread inserts are made from high-quality, 18-8 (type 304) diamond-shaped stainless steel wire. While the inserts are slightly larger in diameter than the tapped hole, the insert is compressed during installation, and then expands, permanently locking it into place.

1 DRILL THE HOLE

Drill to clear out the damaged thread with drill size as specified on kit.

2 TAP THE HOLE

Using the correct size STI (Screw Thread Insert) tap and new 3-way tool, rethread the hole to accommodate the insert.

3 INSTALL INSERT

Insert in with downward pressure until the top coil is 1/4 to 1/2 turn below the surface. Drive the tang downward toward the bottom of the hole.

4 REMOVE TANG

Remove the tool and sit back on top of tang. Tap down sharply. Do not try to twist tang off!

Note: For spark plug port repairs and large fine threads, use long needle nose pliers to remove the tang. For larger holes or when higher strength is required, inserts can be stacked for additional strength. Insert length is 1.5 times diameter (e.g.: 1/2" thread diameter is 3/4" long). For specialty applications, inserts are available to order in 1D and 2D lengths.

Thread Repair Kits

Fix-A-Thread Repair Kits are available in a wide range of sizes for both Unified Inch Coarse (UNC) and Unified Inch Fine (UNF). Kits are available in 33 of the most popular sizes from #8 through 1½" UNC and #10 through 1½" UNF. Metric repair kits are available for coarse and fine threads from M.3 - .5 to M.20 - 2.5. Each handy plastic kit contains inserts, tap, installation tool and instructions. Individual refill inserts are available as well.

Spark Plug Port Repair Kits

There is a Fix-A-Thread product for almost any spark plug type. Our standard Fix-A-Thread spark plug port repair kit, featuring stainless steel wire inserts, is designed to repair any gasketed spark plug port (for sizes M10-1, M12-1.25, M14-1.25 and M18-1.5). Another Fix-A-Thread product, the Plugsaver spark plug port thread repair kit, uses solid steel inserts to repair the plug ports for both taperseat and gasketed plugs.

Using Fix-A-Thread Plugsaver Kits (Solid Inserts)

1 TAP

Pack tap with heavy grease. Hand start tap, then turn with socket wrench to tap hole full depth. Remove chips from hole.

2 SELECT INSERT

Make certain selected insert is same length as the threads on the spark plug. The knurled end of the insert should be at the top of the spark plug hole. Coat outside threads with a high-temperature RTV silicone.

3 INSTALL INSERT

Screw insert in until flush with top of threaded hole. Insertion may be more easily facilitated by using the spark plug where the hole is recessed.

4 FINISH

Place expansion tool into insert and hit several times to expand the knurl. Install the spark plug to recommended torque. Do not run engine until sealant has set (refer to manufacturer's specifications).

Ford Triton Plugsaver Kit / Part No. 98140T

This Fix-A-Thred Plugsaver kit is designed to specifically repair the spark plug ports in 4.6, 5.4 and 6.8 liter Ford Triton engines. This specially configured M14-1.25 Plugsaver kit ensures the secure repair of the spark plug port threads in the Triton engine by providing a mechanically locked solid repair sleeve insert between the threads in the head and the “half-thread” taperseat spark plug. The Triton Engine Kit comes with a handy carrying case providing all parts necessary for quick and easy repair — piloted reamer tap, tap extension, installation tool and 8 inserts. Not designed for 3-valve Triton engines.

Plugsaver Kit / Part No. 98141

Designed to repair M14-1.25 spark plug ports with no drilling required, the Plugsaver repair system has long been the choice of professional mechanics and engine rebuilders. Available in three thread lengths, the Plugsaver insert's mechanical locking system ensures secure installation. Using Fix-A-Thred Plugsaver systems is both quick and easy, and every kit includes three different length inserts, a pilot tap and expansion tool.

- Repairs worn, damaged or stripped threads.
- Can be successfully used with any alloy or cast-iron head.
- Kits available to fit M14-1.25 spark plug port threads, gasketed or tapered.
- Designed for use with almost any engine—automotive, motorcycle, marine, outdoor power equipment and more.

Speciality Products

Oxygen Sensor M18 Thread Repair Kit / Part No. 38189-1

The Fix-A-Thread Oxygen Sensor Thread Repair Kit contains all the tools necessary to permanently repair damaged oxygen sensor threads in the exhaust manifold. The kit, packaged in a sturdy case with all components needed, is designed for ease-of-use by professional mechanics and engine rebuilders as well as do-it-yourselfers.

Motorcycle and Outdoor Power Equipment Repair Kits

Threaded motorcycle parts such as spark plugs, timing plugs, cylinder head bolts, oil pump drain plugs, engine case bolts, cam covers and others require specific thread repair tools, as do threaded parts found in such outdoor equipment as lawn mowers, chainsaws and trimmers. Special Fix-A-Thread kits can help maintain top performance with inserts designed to permanently repair damaged or stripped threads on motorcycles and a wide range of outdoor power equipment. These kits include cost-effective and easy-to-install wire inserts that create threads that are, in most cases, stronger than the original. Also available are threaded inserts that fit National Pipe Thread (NPT).

These Fix-A-Thread kits include all you need to make permanent thread repairs, including inserts, tap and installation tool.

Keysert® Solid Inserts

Designed for such heavy-duty applications as over-the-road trucks, RVs and heavy equipment, Keysert® inserts provide an easy-to-install thread assembly that repairs or replaces damaged threads. Each Keysert features two or four locking keys. Only standard drills and taps are required for installation. These inserts create a positive mechanical lock that prevents rotation and the Keysert insert works in almost all automotive materials.

Each Keysert features two or four locking keys and are manufactured in carbon or stainless steel, in both inch and metric sizes.

Keysert Installation

1 DRILL
Drill out old threads with a standard drill.

2 TAP
Tap new threads with a standard tap. See charts for proper size and depth.

3 SCREW
Align the slots in the installation tool to fit over the keys, and screw in the insert until slightly below surface.

4 DRIVE
Rotate installation tool so slots are not aligned with keys, and drive keys down with several hammer taps.

The slotted installation tool has slots that fit over the keys to twist insert into tapped threads and then stake down.

The sleeve-style tool has a sleeve that fits over the outside of the keys to keep them from splaying during the staking process.

Range Kits

Inserts are sold in packets and in kits containing various insert sizes. Installation tools are available separately or in kits. See price list for full range of inserts and kits.

Drill-Out® & X-Out®

Drill-Out® Extracting Tools

Designed to quickly remove broken bolts and stripped screws, Drill-Out tools are available in a number of sizes: #5 and #6 (M6), #8 (M4) and #10 and #12 (M5), 1/4 inch (M6), 5/16 inch (M8), 3/8 inch (M12) and 1/2 inch (M16). The Drill-Out tool tip provides complete control and allows the user to obtain a perfectly centered hole without the tip “walking” or “wandering.”

Drill-Out Kits

PART NO.	DESCRIPTION	KIT CONTENTS
4017P	Drill-Out Kit (1 Each) - P250, P312, P375, P500	1/4" through 1/2", M6 - M12 extractors
4507P	Drill-Out Kit (1 Each) - P125, P164, P190, P236	No. 5 through 1/4" extractor
7017P	Drill-Out P125, P164, P190, P236, P312, P375, P500	No. 5 through 1/2", M3 - M12 extractors
3719P	X-Out P1 To 3: Set Of 3 removes No. 6 To 14	No. 6 through 14 drill out extractor

X-Out® Damaged Screw Extractor

Designed to be used with reversible power drills, X-out® removes damaged screws quickly and easily. X-out engages the head of a screw and turns it out. Reusable time and time again, this tool can remove screws no. 6-14.

Rivets, Rivet Nuts & Tools

Over the years, Marson® products have built a reputation as one of the most respected brands in the aftermarket industry, offering a wide range of rivets, rivet nuts, installation tools (both manual and air-driven) and kits (including both rivets and tools). Marson products work hard in a wide variety of aftermarket fastening applications.

Blind Rivets

Options include open-end, specialty, closed-end, multi-grip and high-quality plastic rivets made with strong nylon mandrels and Delrin 500 sleeves.

PAGE 26

BT-5 Battery Tool

PAGE 24

Blind Rivet Installation

1 LOAD

Place rivet mandrel in rivet setting tool.

2 INSERT

Using tool as a guide, insert rivet into prepared hole. Engage the mandrel with rivet-setting tool.

3 SET

Squeeze trigger or handles to set rivet. Mandrel ejects after rivet is set.

Rivet Nuts

Marson Rivet Nuts deliver low cost, permanent thread placement in thin material while providing at least six full thread turns per application install. Easy installation can be completed by one operator with minimum training. Rivet Nuts can be used to fasten multiple sheets as well as single sheets.

PAGE 36

SRN-2 Hand Rivet Nut Tool

PAGE 34

Rivet Nut Installation

1 INSERT

Thread Rivet Nut onto tool mandrel and insert into hole.

2 INSTALL

Actuate tool to properly set fastener into material.

3 ADD BOLT OR SCREW

Complete your fastening operation with a bolt or screw with the proper thread. The positive riveting action of the Rivet Nut will provide a permanent thread. As threads are tightened, so are Rivet Nut and application.

Hand Rivet Tools

HP-2® / M39000

The HP-2 is the number one selling hand rivet tool in the industry. Known and trusted for durability, quality and performance, the HP-2 is often copied but never duplicated. Its square-shoulder fulcrum pin of cold-formed, heat-treated steel alloy prevents pin rotation that can elongate the engaging holes and cause premature tool failure in imitation tools. Other quality features include: precision die-cast, high-strength aluminum alloy body with steel insert for durability; drop-forged carbon steel upper handle; and thick, cushion-molded vinyl eco-friendly plastic grips for comfort. The HP-2 sets 3/32", 1/8" and 5/32" rivets in all materials and up to 3/16" steel rivets, and comes with four mounted nosepieces (3/32", 1/8", 5/32" and 3/16") and a service wrench. Refer to the Hand Rivet Tool Capacity Chart on page 31 for specific capabilities.

Weight: 1.2 lbs.

HP-5™ / M39011

The HP-5 is specially designed for securing the rivet in the nosepiece while the tool is in any position. It has ergonomic handles with power-saving design and eco-friendly, soft-plastic grips to increase leverage, and deliver powerful riveting with 4 standard nosepieces changed with included service wrench to set 3/32", 1/8" and 5/32" rivets in all alloys and up to 3/16" in steel. The drop-forged steel handle is heat-treated, and the die-cast aluminum alloy body has a steel insert for durability. Has a strong anti-wearing fulcrum pin, durable jaws and jaw case, and valuable powder coating finish.

Weight: 1.22 lbs.

200 Kit™ / M39001

The deluxe hand riveter kit includes the HP-2 and 200 assorted Klik-Fast rivets in popular sizes. The molded plastic case houses and protects the tool, rivets and optional countersink double ended drill bit.

Weight: 4 lbs.

Stainless Steel Kit / M39003

This kit is the same as our 39001, but contains 200 assorted Klik-Fast stainless steel rivets.

Weight: 4 lbs.

HP-4x4™ Multiplex Kit / M39410

The Marson HP-4x4 Multiplex Hand Tool is a new, patented design that allows a single tool to set blind rivets (up to 3/16" steel), rivet nuts (up to 1/4-20 steel), MET series rivet bolts/studs (up to 1/4-20 steel), MQN series (jack nuts) and MXN series rivet nuts (up to 1/4-20 steel). This inch size kit includes 4 blind rivet Nosepieces (3/32", 1/8", 5/32", 3/16") and jaw system, 5 Threaded Mandrels (6-32, 8-32, 10-24, 10-32, 1/4-20 rivet nuts), 3 Threaded Sockets (8-32, 10-24, 10-32 MET rivet bolts/studs) and 4 rivet nut Nosepieces (#6, #8, #10, 1/4). Metric Nosepieces and Mandrels M3 - M6, and spare parts, are available from Howmet sales.

Klik-Turn® SP-2 / M39015

The SP-2 360° swivel head rivet tool features a patented positive-ratchet locking feature that allows head to turn 360° and lock in place at any of the 45+ positions. A patented Rivet Size Hole Gauge eliminates selection of the wrong size rivet size for a nosepiece. It's ideal for riveting in difficult places at any angle. The SP-2 includes 4 nosepieces, built-in storage holes and a service wrench. Sets up to 3/16" steel rivets.

Weight: 1.55 lbs.

VHR-1 / M79000

This economic hand riveter offers all-steel construction, setting rivet sizes 3/32", 1/8" and 5/32" in all alloys and 3/16" in steel. Service wrench and locking tab included.

Weight: 1.2 lbs.

VHR-1X/M79002

This hand rivet tool offers durable, all-steel construction and sets 3/32"-5/32" diameter rivets in all alloys and 3/16" in steel. The extended nosepiece can reach 1-3/4". Service wrench and locking tab included.

Weight: 1.2 lbs.

VHR-2 / M79032

This value-priced tool sets 1/8" - 1/4" diameter rivets in all materials. It can also set T-Rivet / Klik-Split® and all other structural blind rivets. With its heavy-duty construction and longer handles, access to hard-to-reach areas is easier.

Weight: 2.5 lbs.

Monobolt® is a registered trademark of Avdel® * When setting Marson brand Klik-Lock rivets, no special nosepiece is required.

Hand Rivet Tools

Big Daddy® / M39031

The Big Daddy® and Big Daddy II are the most versatile and powerful Marson brand hand riveters, taking the hard work out of setting large diameter blind rivets. Extra long handles provide superior leverage and permit working a foot beyond natural reach. Other features include a special bearing design, self-adjusting two-piece jaws and single-unit body construction with a steel insert to provide stronger threads for the nosepieces included. Both feature a double-gear reduction system which easily sets from 1/8" to 1/4" diameter Klik-Fast rivets in all alloys, including 1/4" Klik-Split® and 3/16" and 1/4" Klik-Lock® rivets. A one-piece collet case eliminates the need to adjust the tool when changing rivet diameters. Both Big Daddy and Big Daddy II come with 5/32", 3/16" and 1/4" nosepieces which are stored in the body.

Weight: 3.75 lbs.

Standard head

Big Daddy II / M39032

Exclusive to Big Daddy II: a built-in mandrel collection receptacle; just remove the end cap on the bottom handle to discard the spent mandrels.

Weight: 3.75 lbs.

Big Daddy / M39010

This is the same tool as 39031, but comes with 3/16", 1/4" and special 1/4" Klik-Split rivet nosepieces.

Weight: 3.75 lbs.

Big Daddy / M39035

This is the same tool as 39010, but comes with 39009 attached, extending the tool's reach by an additional 2-1/2".

Weight: 4 lbs.

Extended head

Big Daddy Extended Nosepiece Kit / M39009

Just two installed parts extend the reach of 39031 or 39010 by an additional 2-1/2".

Weight: .25 lbs.

Plastic Rivet Tool & Kit

Klik-Lock® KL-2 Plastic Rivet Setter / M48005

This long-reach tool is just what today's professional needs for hard-to-reach spots, especially in automotive applications such as flexible bumpers, wheel wells, license plate brackets and bumper reinforcements. In addition to the tool's long reach, it offers one-stroke setting and a universal nosepiece that sets all plastic rivets. The tool is packaged in a reusable, heavy-duty vinyl pouch.

Weight: .75 lb.

Professional Plastic Rivet Kit / M48006

This kit includes the versatile KL-2 Plastic Rivet Setter, plus a 20-pack each of our four most popular rivet sizes: Nos. M58106, M58108, M58149 and M58150. A reclosable carton provides storage for rivets and tool.

Weight: 1.5 lbs.

Air & Battery Powered Rivet Tools

These next generation, professional series air / hydraulic riveters are designed to be lightweight and well-balanced. Both are engineered to maximize stroke and pull force with a 3-jaw set. For added convenience, you can direct connect or use the attached swivel. Each tool is supplied with nosepieces to set rivets in all alloys and comes complete with adjustment service wrenches, hydraulic fluid, fluid applicator, spare jaws and a removable swivel air connection line with an air OFF / ON valve built in. An adjustable vacuum system allows you to control the force of air needed to hold the rivet in place, or you may operate with the vacuum system turned off. Recommended air pressure is 70-95 psi.

Each of these proven, professional tools features a one-piece molded frame and front swivel air inlet for maximum operator comfort and durability. An external vacuum adjustment offers convenient air flow control for rivet placement and mandrel disposal. This allows the operator to install rivets in any orientation using one hand, and freeing up the other for assembly. Spent mandrels are conveniently collected in the bottle for disposal, encouraging a safer, clean work environment. Tools come complete with oil, replacement jaws and nosepieces. Recommended air pressure: 85-95 psi.

M-3 / M39054

This heavy-duty air riveter with its thoughtfully designed aluminum forged head can hold up under demanding continuous use. The head allows for continuous full operating power and less internal wear. Included with the M-3 are standard 1/8", 5/32" and 3/16" nosepieces, a service wrench, swivel inlet air coupler and a mandrel collection bottle. The recommended air line pressure is 85-95 PSI.

Stroke: .551" (14mm)

Pulling Force: 1,983 lbs. (8,820n)

Capacity: 1/8" (3.2mm) to 3/16" (4.8 mm) in all alloys including some structural rivets

Weight: 4.2 lbs.

M-4 / M39058

This heavy-duty air riveter with its thoughtfully designed aluminum forged head can hold up under demanding continuous use. The aluminum forged head allows for continuous full operating power and less internal wear. The M-4 has the capability of setting 3/16" and 1/4" T-Rivets/Klik-Split, Klik-Lock and all other structural blind rivets (special optional nosepieces may be required). The M-4 is supplied with 3/32", 5/32", 3/16" and 1/4" standard nosepieces, service tools, swivel inlet air coupler and a mandrel collection bottle. The recommended air line pressure is 85-95 PSI.

Stroke: .748" (19mm)

Pulling Force: 3,500 lbs. (13,784n)

Capacity: 3/32" (2.4mm) to 1/4" (6.4mm in all alloys including structural rivets

Weight: 6.6 lbs.

MP-3V / M39045

Stroke: 3/4"

Pulling Force: 1,800 lbs.

Capacity: 3/32" - 3/16", all alloys

Weight: 2.9 lbs.

301-E / M39061

Stroke: 0.807"

Pulling Force: 2,360 lbs

Capacity: 3/32" - 3/16" diameter in all alloys; up to 1/4" in aluminum

Weight: 3.5 lbs.

Automatic Air-Stop: cuts vacuum draw when idle

MP-4V / M39048

Stroke: 1"

Pulling Force: 3,420 lbs.

Capacity: 5/32" - 1/4", all alloys, 1/4" Monobolt® nosepiece included

Weight: 3.7 lbs.

304-E / M39064

Stroke: 1"

Pulling Force: 4,200 lbs.

Capacity: 3/16" to 1/4" in all alloys, including structural rivets. Also included are 3/16" and 1/4" Monobolt® and Magna-Lok® assemblies

Weight: 5.5 lbs.

IntegraFuse IF-1 / M39075

Stroke: 1.125" (28.575mm)

Pulling Force: 4,600 lbs. (20.5kn)

Capacity: 3/16" (4.8 mm) to 1/4" (6.4mm)

Weight: 4.8 lbs. (2.177kg)

Extended Head Accessory for 301-E and 304-E

301-E / M39061	5" Extension Head	M88082
301-E / M39061	8" Extension Head	M88086
304-E / M39064	5" Extension Head	M723358

BT-5 / M38990

The Marson® BT-5 is among the best values you'll find anywhere for industrial-strength, battery-powered riveters. Engineered for dependability on the factory floor or at the job site, BT-5 delivers reliable performance at a fraction of the cost of other high-performance riveters.

The Marson BT-5 Kit includes nose tips for 1/8", 5/32" and 3/16" rivet diameters. An optional nosepiece allows you to install 3/32" rivets, as well.

Stroke: 0.866" (22 mm)

Pulling Force: 2,248 lbs. (10,000 n)

Capacity: 3/32" (2.4mm) to 3/16" (4.8 mm)

Weight (with Li-ion battery pack): 4.21 lbs. (1.91 kg)

Battery Pack: 18 V / Li-ion / 2.0 Ah

Recharge Time: approx. 45 minutes

BT-6 / M38996

The Marson® BT-6 is a battery-powered riveter designed to deliver reliable pull-force for high-volume assembly applications. Engineered for versatility and extensive use on factory floors and job sites, this portable powerhouse offers a durable value.

The Marson BT-6 kit includes nose tips for 3/16" and 1/4" rivet sizes.

Stroke: 1.1024" (26 mm)

Pulling Force: 4,496 lbs. (20,000 n)

Capacity: 3/16" (4.8 mm) to 1/4" (6.4mm)

Weight (with Li-ion battery pack): 4.28 lbs. (1.91 kg)

Battery Pack: 18 V / Li-ion / 2.0 Ah

Recharge Time: approx. 45 minutes

AH-250 / M39510

Nose Assembly: Optional part

Stroke: 0.728"

Pulling Force: 5,280 lbs.

Capacity: Standard Rivets 5/32" - 1/4"
Structural Blind Rivets 5/32" - 1/4"
C6L® and Magna-Grip® 3/16" - 1/4"

Weight: 5.58 lbs.

MUNA 8™ Nose Assembly / M96557

Optional MUNA 8™ for AH-250 sets 5/32", 3/16", and 1/4" Blind Rivets, both Standard and Structural, simply by changing out the included Nosepieces.

HUCK® Nose Assemblies

Optional HUCK® Nose Assemblies for AH-250 set Structural Blind Rivets 3/16" - 1/4" and C6L® and Magna-Grip® 3/16" - 1/4" lockbolts.

V-2 / M79014

Stroke: .551"

Pulling Force: 1,870 lbs.

Capacity: 3/32" – 3/16", all alloys

Weight: 3.5 lbs.

V-3 / M79050

Stroke: .551"

Pulling Force: 1,983 lbs.

Capacity: 1/8" – 3/16", all alloys

Weight: 3.2 lbs.

V-4 / M79060

Stroke: .562"

Pulling Force: 3,055 lbs.

Capacity: 3/32" – 1/4", all alloys

Weight: 4.4 lbs.

Recommended airline pressure: 85-95 PSI.

**For Monobolt® structural rivets, the noted special nosepiece is required. For Marson brand Klik-Lock® structural rivets, no special insert is required.

Open-End Structural Rivets

Features & Benefits

- For blind fastening where there is no access to opposite side of work
- Simple to install
- Wide variety of head styles and lengths available from 3/32" to 1/4" diameters

Materials Available

Steel / steel, Aluminum / aluminum, Aluminum / steel, Stainless / stainless, Stainless / steel, Copper / brass, Copper / steel

Open-End Rivets

Closed-End & Klik-Lock Structural Rivets

Features & Benefits

- Moisture-resistant due to tight seal
- Greater shear and tensile strength
- Mandrel is retained 100% of time
- 1/8" to 1/4" diameters

Materials Available

Aluminum / steel, Aluminum / aluminum, Stainless / stainless

Closed-End Rivets

Features & Benefits

- Permanently retained mandrel provides increased and tensile values
- Use in high vibration applications
- Provides weather-resistant joint
- Available in 3/16" and 1/4" diameters

Materials Available

Steel / steel, Aluminum / aluminum, Stainless / stainless

Multi-Grip Rivets

Plated Steel Mandrel IFI Grade 30

Multi-grip rivets provide an effective and economical alternative to other, more costly methods of fastening, because one size handles the grip range capacity of up to three standard open end rivets. Multi-grip rivets can be used in any application requiring open end rivets, while reducing inventory requirements. Use multi-grip rivets as a standard open-end rivet. No special tool is needed.

Features & Benefits

- Extended grip range capacity
- Reduces inventory (fewer sizes required)
- Use as a standard open end rivet
- 1/8" to 3/16" diameters

Materials Available

Aluminum / steel, Steel / steel

Klik-Lok™ Plastic Rivets

Marson brand Klik-Lok™ Plastic Rivets are the same precision-molded all-nylon rivets used by domestic auto manufacturers, both for original equipment and replacement parts. In addition, Klik-Lok Plastic Rivets are ideal for non-conductive and non-corrosive environments. Klik-Lok Plastic Rivets fasten plastic to plastic, plastic to metal and plastic to fiberglass. As they set, three “legs” form to securely lock the components in place and prevent pullout.

Features & Benefits

- Precision-molded, all-nylon
- Secure lock prevents pull-out
- Fasten plastic to plastic, plastic to metal or plastic to fiberglass

Klik-Lok™ Plastic Rivets

Actual Size Rivets/Flanges

When ordering, match diagram reference letter with those in the chart.

Rivet Nuts & Tools

More sizes. More finishes. More Arconic quality. That's what you'll get with Marson Rivet Nuts. This industry standard Rivet Nut line features a wide range of types, sizes and finishes including ribbed, hex body, neoprene / brass and knurled designs, all manufactured for reliability and strength. All while delivering the superior features and benefits you've come to expect from Arconic Fastening Systems. In addition, the Rivet Nut system includes a broad selection of tools providing ease of installation.

SST Series

The versatile, low cost Spin/Spin pneumatic Rivet Nut production tool now comes with a quick-change nosepiece assembly and standard socket head cap screw for convenient replacement and change-over. For added ease of operation, the Spin/Spin offers a superior ergonomic design, lightweight body and operates without stroke adjustment. Available models come with two front assemblies of your choice (refer to table below).

OPERATOR IS LIABLE FOR CORRECT AIR PRESSURE. DO NOT EXCEED 100 PSI.

Purchasing the Optional Front End Assemblies are at the Owner's discretion. Care must be taken to optimize the tool's Rivet Nut setting ability. Recommended for thin wall Rivet Nuts only. Adjustment of the air pressure will be necessary in order for the tool to function in both minimum and maximum capacity on ALL optional thread sizes per tool. Contact customer service for available retrofit for MET external thread.

Additional nosepiece and mandrel sizes are available:

SST-1/M39801 - 3000 RPM
 SST-2/M39802 - 1500 RPM
 SST-3/M39803 - 600 RPM
 SST-4/M39804 - 400 RPM

Rivet Nut Tools

Klik-Turn® SRN-2 / M39400

The SRN-2 swivel head, hand held Rivet Nut tool features a positive-ratchet locking feature which allows the swivel head to turn 360°. This feature helps hold in place in forty-plus positions. An innovative design, the SRN-2 features a heavy-duty steel plate upper handle and precision die-cast body of high-strength aluminum. In addition, the SRN-2 offers adjustable stroke with a positive locking feature, quick-change mandrel, comfortable hand grips and longer handles to improve leverage. Included are built-in threaded nosepiece storage holes and a service wrench. The SRN-2 can set steel and aluminum Rivet Nuts up to 1/4-20" and 6mm. The tool is supplied with 6-32, 8-32, 10-24, 10-32 and 1/4-20 mandrels and nosepieces.

Rivet Nut Setter RN-1 / M39300

The RN-1 features a quick-change mandrel, long handles for improved leverage, and a locking adjustable-stroke. Ergonomically designed with a forged, heat-treated steel upper handle, precision die-cast body of high-strength aluminum alloy, patented fulcrum pin design and comfortable hand grips. This tool includes 8-32, 10-24 and 10-32 mandrels and nosepieces, but can install all sizes of Rivet Nuts and threaded inserts up to 1/4-20 and 6mm threads in steel with optional mandrels and nosepieces. Available in a variety of other kits.

Weight: 1.2 lbs.

325RN / M34604

Choose the M34604 for installing larger size Rivet Nuts. Model M34604 is a heavy-duty tool that will install 10-24 through 3/8"-16, and 5mm through 10mm threaded inserts in aluminum or steel. It features quick-change mandrels with an easily adjustable stroke. Supplied with 1/4"-20 mandrel and nosepiece only.

Weight: 4.25 lbs.

Rivet Nut Kits

Rivet Nut Kit / M39301

Model M39301 Rivet Nut Kit contains the M39300 Rivet Nut tool in a molded plastic case; mandrels and nosepieces for 6-32, 8-32, 10-24 and 1/4-20, instructions and wrench. The kit also includes 103 assorted Klik Rivet Nuts and Klik Poly-Nuts: 25 each M57210, M57425, M57130; 20 each M57250; 8 each M57445.

Weight: 2.75 lbs.

Poly-Nut Kit / M39302

Model M39302 Poly-Nut Kit contains the M39300 Rivet Nut tool in a molded plastic case with 8-32, 10-32 and 1/4-20 mandrels and nosepieces, wrench and instructions. The kit contains 52 assorted Klik Poly-Nuts: 12 each M57425, M57435, M57445; 16 each M57455.

Weight: 3 lbs.

Metric Poly-Nut Kit / M39303

Model M39303 Metric Poly-Nut Kit contains the M39300 Rivet Nut tool in a molded plastic case with 4mm, 5mm, 6mm and 8mm mandrels and nosepieces, wrench and instructions. The kit contains 75 assorted Klik Poly-Nuts: 25 each M57407, M57409; 15 each M57411; 10 each M57413.

Weight: 3.25 lbs.

Aluminum Klik Thread-Sert Kit / M39313

Model M39313 Thread-Sert Kit contains the M39300 Rivet Nut tool in a molded plastic case with 6-32, 8-32, 10-24, 10-32, 1/4-20, 5/16-18 and 3/8-16 mandrels and nosepieces, wrench and instructions. The kit contains 62 assorted Aluminum Klik Thread-Serts: 10 each M57910, M57920, M57930, M57940, M57950; 6 each M57971, M57981.

Weight: 3 lbs.

Steel Klik Thread-Sert Kit / M39314

Model M39314 Thread-Sert Kit contains the M39300 Rivet Nut tool in a plastic case with 6-32, 8-32, 10-24, 10-32, 1/4-20, 5/16-18 and 3/8-16 mandrels and nosepieces, wrench and instructions. The kit contains 62 assorted Steel Klik Thread-Serts: 10 each M57810, M57820, M57830, M57840, M57850; 6 each M57871, M57881.

Weight: 3.25 lbs.

Ribbed Rivet Nut Kit / M39315

Model M39315 Ribbed Rivet Nut kit contains the M39300 Rivet Nut tool in a molded plastic case; mandrels, nosepieces, wrench and instructions for setting 8-32, 10-24, 10-32 and 1/4-20 Rivet Nuts. The kit also includes 50 assorted Ribbed style Rivet Nuts: 12 each M57320, M57330, M57340; 8 each M57350; 6 each M57354.

Weight: 2.75 lbs.

Metric Ribbed Rivet Nut Kit / M39316

Model M39316 Ribbed Rivet Nut kit contains the M39300 Rivet Nut tool in a molded plastic case with 4mm, 5mm and 6mm mandrels and nosepieces, wrench and instructions. The kit also includes 50 assorted Ribbed style Rivet Nuts: 12 each M57360, M57385, M57384; 8 each M57386; 6 each M57387.

Weight: 2.75 lbs.

ML Series Ribbed Rivet Nuts

Available in Steel-Zinc Plated or Aluminum Class 2B Threads

ML Series Ribbed Rivet Nuts provide an efficient and cost-effective method of placing permanent threads in thin materials. Installed from one side, these inserts are perfect for use in metal, fiberglass and rigid plastic too thin for tapped threads. Lightweight manual and pneumatic tooling ensures easy installation. Once in place, the insert's internal threads are ready for a screw or bolt. Additional features include: increased torque strength over conventional style, 60° ribbed expansion after setting, vibration resistance and a large flanged head which increases push out strength.

MRN Series Flathead Rivet Nuts

Available in Steel-Zinc Plated or Aluminum Class 2B Threads

Lightweight tooling ensures easy installation by the operator and reduces costs when compared with other methods. After installation, MRN Series Rivet Nuts provide permanent, captive threads that do not allow loosening under vibration and will not rotate when attached to the mating material.

MRN Series Rivet Nuts can be used in a wide range of applications and are designed to provide a very efficient and cost-effective method of placing permanent threads in thin materials. Installed from one side, MRN Nuts are perfect for use in metal, fiberglass and rigid plastic previously too thin for tapped threads. They provide a neat appearance and, once in place, the internal threads are ready for a screw or bolt.

MRN Series Rivet Nuts with large diameter heads can be used in soft materials which inherently offer little, if any, thread strength.

The flathead design provides the most bearing surface for higher torque applications. The larger flange extends above the material in which it is installed and provides a built-in spacer.

Poly-Nuts & MQN Series Quad Leg Nuts

Available in Steel-Zinc Plated or Aluminum Class 2B Threads

Poly-Nuts can be used in a wide range of applications and are designed to provide a very efficient and cost-effective method of placing permanent threads in thin materials. Installed from one side, Poly-Nuts are perfect for use in metal, fiberglass and rigid plastic previously too thin for tapped threads. Poly-Nuts provide a nearly flush appearance and, once in place, the internal threads are ready for a screw or bolt. Lightweight tooling ensures easy installation by the operator and reduces costs when compared with other methods. After installation, Poly-Nuts provide permanent, captive threads that do not allow loosening under vibration and will not rotate when attached to the mating material.

Quad Leg Nut Installation Tool (MJN-2 / M39043)

Marson's MJN-2 hand-held Quad Leg Nut Installation tool is designed to effortlessly set quad leg nuts and Jack Nuts® in sizes ranging from #6-32 to 1/4-20 and M4 to M6. It works by threading the bolt to the quad leg nut, then dropping the component in the slot of the tool, inserting it into the pre-drilled hole and squeezing until set. Tightening the exposed bolt completes the installation.

Jack Nut® is a registered trademark of Stanley Engineered Fastening.

MNN — Neoprene Inserts

Neoprene Insert contains pre-molded brass nut for quick fastening in vibration, moisture protection, shock dampening and even electrical insulation applications. Easy installation is possible from blind side with conventional wrench. Just insert the proper thread screw or bolt and tighten.

Metric sizes are class 6H thread. * Built to order, minimums required.

Huck® Tools and Fasteners

When you see the Huck® name, you know it'll stay fastened tight, no matter how vibration-intensive the application. It's this superior holding strength that has built Huck's reputation as one of the leading suppliers of engineered fastening systems for both OEM and aftermarket applications.

You'll find Huck fasteners in a number of critical areas of trucks and trailers. In truck chassis, swaged HuckBolts ensure the long-term joint integrity of shock mounts, suspension members, ladder assemblies and 5th wheel angles. Additionally, they never require inspection, re-tightening or re-torquing.

How Structural Blind Fasteners Work

TENSILE STRENGTH

Huck Structural Blind Rivets form a blind side positive lock either by bulbing or expanding of the sleeve. The sleeve, assisted by the permanently secured bolt, therefore resists failure along its center line.

BULBING

The sleeve of the fastener is compressed, causing it to fold outwards to form a bulb. This form itself tightly against the joint material. Once the bolt is permanently locked into place the pintail will break off, completing the installation.

EXPANDING

Pulling on the pintail causes the head of the bolt to draw into the sleeve. This expansion causes a foot print to form against the joint material.

Huck HK-150

The Huck HK-150 is an easy-to-use, lightweight (18 oz.) riveter. Ideal for repair and maintenance applications, the manually operated, hydraulically powered HK-150 can efficiently install rivets from 3/32" through 1/4".

HFS offers a wide range of pull-up studs and anvils, both metric and imperial. For more information please consult the price list.

Huck AK-175

Built for maintenance and repair applications in the shop or in the field, the Huck AK-175 riveter is compact and lightweight at only 26 oz. Despite its light weight, it develops 3,500 pounds of pulling force. Highly versatile, the AK-175 features a unique jaw system allowing setting of rivets from 1/8" through 1/4" using changeable nosepieces.

Huck 205400

Designed to crimp U.S. and imperial Rivet Nuts into thin metal sheeting, the 205400 includes master shaft assembly and turn nut, 1/4-20 and 10-24 pull-up studs and driving anvils.

Huck 205401

This comprehensive kit crimps metric Rivet Nuts into thin metal sheeting. It includes master shaft assembly and turn nut, as well as 6mm and 8mm pull-up studs and driving anvils.

Huck Tools and Kits

Huck Range Force

The Huck® Range Force Battery Tool is a battery-powered, adjustable force installation tool for multiple application use. It's high pull force and long stroke enable installation of structural and non-structural rivets and up to 1/4" two-piece HuckBolt® fasteners*.

* Excludes 1/4" BOM

Huck PR-75

A durable tool that installs plastic rivets up to 6.6 millimeters in diameter in a single stroke. Efficiently designed for one-hand operation, the PR-75 avoids breaking the rivet stem prematurely, and is able to reach areas inaccessible to level-type tools.

Huck Rivet Shaver 105-MT

The Huck® Rivet Shaver tool fits any standard size drill and burnishes 5/32", 3/16" and 1/4" shavable rivet heads to leave a clean, solid appearance that closely matches solid or brazier head rivets.

Huck PR-75K

The kit includes PR-75 Quick-Set Riveter, carrying case and four rivet starter packages: 5-millimeter plastic rivets for Ford and GM applications (Huck part number 205325); 5-millimeter plastic rivets for Chrysler applications (Huck part number 205328); 6.3-millimeter plastic rivets for Chrysler, Ford and GM applications (Huck part number 205326); 6.6-millimeter plastic rivets for GM applications (Huck part number 205327).

Huck 2025

Ideal for production applications, the Huck 2025 weighs just 7.5 lbs. without the nose assembly. The 2025 installs up to 3/8" blind bolts and 1/4" lockbolts, while delivering a pull pressure of 5,290 lbs.

Note: Huck nosepieces are sold separately

Huck Big Daddy

The Huck Big Daddy manual riveter is a versatile and powerful hand riveter, with extra-long handles for leverage and ability to work a foot beyond natural reach. Big Daddy has a patented bearing design, and a double gear reduction system. A one-piece collet case eliminates the need to adjust the tool when changing rivet diameters.

Huck Fasteners

In truck cab applications, Magna-Lok, HuckLok and Magna-Grip provide maintenance-free joints for many different components including storage compartments, vent openings, door and floor structures, skin reinforcements and firewall assembly. Using Huck lock bolts and blind fasteners reduces cost and assembly time while eliminating safety issues of welding.

Huck Aftermarket Starter Kit - TCR-KIT

REFILL PACK QTY	DESCRIPTION CODE	DESCRIPTION AND GRIP RANGE
25	MGLP-R6-4-PKT	3/16" Steel Locking .062-.270
