Aluminum Repair

SPR RIVETER DF-SPR67

Kit Includes:

SPR Riveter, HR2 Arm, Matrix Sets (SPR 3mm, SPR 5mm, SPR Extractor, Hole Punch, Flow Form), Sample set of rivets, Arm locking pin, Grip handle, Shoulder strap, and Storage Case.

Our Self-Piercing Riveter is a reliable tool for riveting aluminum panels (up to 6.5mm) together with high dynamic strength. The pressure and speed controls increase accuracy and enable the rivets to be inserted without panel distortion. A pressure gauge on the unit illustrates current pressure amount for controlled operation.

Aluspot - EXTENDED DF-900DXE

The Aluspot Extended includes everything that the Ford Approved Aluspot Deluxe (DF-900DX) does PLUS comes with an Aluminum-Head Hammer Set (DF-AH714), POM Nylon Dolly Set (DF-AB712), two more storage drawers, in-cabinet electrical power strip, and a holster on the side of the cabinet to hang the heat gun.

Aluspot - MINI DF-900B

Now, any shop can invest in the future and start repairing minor to moderately damaged aluminum panels. The DF-900B Mini Aluspot Repair System is designed to operate as the main unit or as satellite unit. It utilizes some of the same Dent Fix innovations and premier equipment as the larger Aluspot systems but at a fraction of the price.

MAXI - 220v DF-505/220V

The MAXI is a 220 volt single phase dent pulling station that provides the technician with the power they need to shrink, pull rocker panels, hail damage, creases, dents in hard to access areas and all types of metal damage. The efficiency of this tool increases the workers productivity while producing a better repair. Taking the idea of a stud welder one step further, this versatile tool will: weld pins, weld a slide hammer directly to the panel, weld a light pulling rod, weld wiggle wire for even crease pulling, weld a rod for leverage pulling, and shrink metal. WELD, TWIST, PULL!

N2 HOOK UP FOR AIR TOOLS!

Mobile & nimble cart can be positioned all over the shop

Kit Includes:

Nitrogen welder with torch, airless weld torch, nitrogen generator, N2 outlet, rolling cart, power strip, heat gun/hot stapler holster, hand seamer, aluminum tape roll, and plastic sample pack (Polyurethane, Polypropylene, Polyethylene, Polycarbonate, ABS, & Nylon)

EZ Nitrogen Plastic Welder- Generator

DF-EZN1G

The EZ Nitro Plastic Welder Generator eliminates the need for refilling nitrogen tanks and has a smaller footprint taking up less space in the shop thanks to its on-board nitrogen generator. The Flow Adjust Switch Technology (FAST) system makes the DF-EZN1G the easiest nitrogen welder to use by eliminating the need for flow adjustments by the user.

DF-1610T), Oil Kit,
and Case

Spot Annihilator Deluxe Kit DF-15DX

Customers often ask us what's NEW. My response has always been it is new if you haven't seen it before. The spot weld drill featured has been around for a long time, but there is something you may not have realized. We invented the concept of the air supplying the drill point pressure in 1993. Yes, this tool supplies all the cutting pressure for you. No need to push. The drill point is pushed forward into the C-Clamp. This also has the effect of locking you in place, no walking around the panel.

When UHSS or Boron Steel came out we lowered the speed from 1800 to 1000 RPM. You see, you need an ultra hard bit to get through this material, regular bits don't cut it, pun intended. The solution was a Tungsten Carbide bit (DF-1690) "Boron Killer", but it requires the lower RPM or they break easier. The change also had the added benefit of helping prevent the overheating of the regular bits.

Now, speaking of longer bit life, our drill is known for its controlled approach and consistent pressure. We call this The "Predator Approach". It is a patented system that prevents the drill point from slamming into the panel. This prevents breakage of the bit and helps the tech make sure to be on target and precisely remove the spot weld. No slamming and consistent pressure are achieved by a valve system that opens on approach and closes when the drill starts turning.

Simply ingenious!

ELIMINATOR

INLINE UNDERCOAT AND DECAL REMOVER

DF-700DX

If you don't have one you need one. The DF-700DX tool is so effective you will wonder what you ever did without it.

With the Course brush, undercoating and seam sealer are stripped away easily and cleanly, right down to the bare metal. The Brushes do not clog up. Remove rust and scale with the Medium brush and the fine brush is perfect for getting paint out of tight spaces. The geared Decal Eraser will strip a 2 foot by 2 foot decal in less than 2 minutes with no paint burn. The eraser is ideal for removing the adhesive backing on moldings and badges.

This inline version of the tool carries a year warranty and our guarantee of complete satisfaction.

Kit Includes:

Eliminator Tool, Original Decal Eraser, Offset Decal Eraser, Fiber Discs, Single Hub, Double Hub, Coarse Brush, Fine 23mm Brush, 11m Coarse, Fine Brush, and Blow Molded Cases.

CLAMP IT - To Edge of a workbench

Flex-O-Light

DF-LED110

Designed to be able to illuminate the darkest of workspaces, the Flex-O-Light utilizes a unique flexible body that can extend up to 22.64" and wrap around objects to suspend and hold the light in the correct position. The light can also be mounted in three different ways: clamp, stick, or hang. The 2" clamp is located inside the handle and can be extended and contracted by rotating the yellow ring on the body. The end of the body contains two strong magnets, for ferrous mounting locations, and a collapsible hook that can unfolded to hang from hoods and the undercarriage. 1 year limited warranty.

Strong Magnets and Collapsible Hook

Flex It!

Outer

Inner

Door Skin Pliers

DF-DSP310

Hold the door skin securely in place while repairing. There are specialized pads for either side of the door. Inner pad spreads the clamping force and the cushioned outer pad prevents paint marring. A must have body repair tool.

No more guessing whether your pointers are centered or not!

Accessory Tram Points

DF-3TCAS

Measuring solo just got easy! All cones are self-centering for higher accuracy. The two Cones are for holes up to 40mm. Four Reverse Cones are for bolts and nuts up to 19mm. Machined aluminum construction for durability. Tram gauge sold separately.
