

SATAjet® 100 B™

German Engineering

Spray Guns | Cup Systems | Breathing Protection | Air Filtration | Accessories

Specialists In Their Profession

- Primer/Sealer spray guns with low over spray
- Minimal sanding effort
- Extremely smooth material application

SATAjet 100 B – Unmatched for the Application of Primer Materials

Undercoat materials such as **primer, sealer, filler and spray putty** fulfill an important function within the paint process. Therefore, particular attention must be paid to the application of these materials, using a dedicated primer gun.

The wide nozzle range of the SATAjet 100 B allows to apply all sorts of undercoat materials. The fine atomization and wide spray fan of the SATAjet 100 B help achieve **even material distribution**, saving expensive labor time due to the reduced time in sanding.

The SATAjet 100 B F RP is an extremely versatile spray gun allowing to adjust the atomization pressure easily. From spot repair to large surfaces – starting from a **gun inlet pressure of 7.25 psi**, this primer gun can be adjusted in a way which allows to repair even small areas economically with extremely low over spray.

PRODUCT DETAILS

- Primer/Sealer spray guns with low over spray
- Smoothly polished, ergonomically optimized gun body
- Sturdy air cap thread
- Self-tensioning packings
- Air micrometer for atomization air adjustment (SATAjet 100 B F HVLP/RP)
- Material flow control with locking nut
- Round/flat spray control for single-hand operation
- CCS clips for individual marking
- Trigger with paint needle cover
- QCC cup connection
- Comes standard with QCC RPS cups 0.3 l, 0.6 l, 0.9 l, 1 ea.

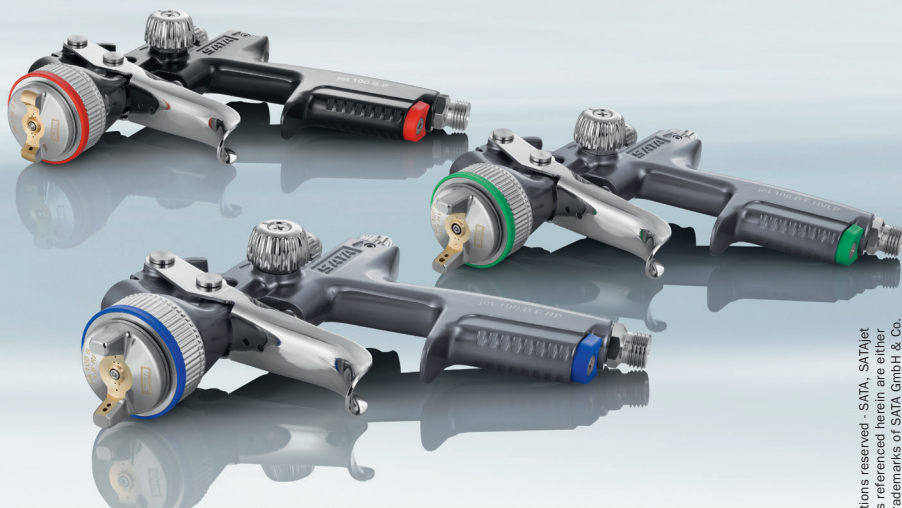

The appropriate solution for every professional

According to his technique, the object and the material, the painter has the choice between the “Super Saver” **SATAjet 100 B F HVLP** and the “Super Speed” **SATAjet 100 B F RP**. Both versions (HVLP **low pressure** and RP **optimized high pressure/compliant technology**) achieve transfer rates exceeding 65%.

Both guns lend themselves perfectly for the application of waterborne as well as solvent-based primer and sealer materials.

The **SATAjet 100 B P** is specially designed for the application of polyester spray putty/filler and is indispensable for creating high film builds along with a sharp-edged fan.
