

CTA #6510

FLUID EXTRACTOR TANK

This 15 Liter Fluid Extractor System is hand or air-operated for fast extraction of any type of fluid. The two diameter extracting tubes included have been updated from 41" to 48", a 7" length increase for easier use on larger applications. The third extracting tube is specially designed to be universally used for Brake & Clutch Fluid (Length = 64 in.). The unit has a vacuum release button for quick & easy release. Displace up to 15 Liters (4 GAL) of fluid in minutes while maintaining a clean, oil-free work space. The thick walls of the tank make this tool one of the most durable on the market. A specially designed pour spout for mess-free emptying of container & a flip out foot holder for stability while using the extractor pump with two hands. Applications include: ALL vehicles which hold up to 15 Liters, 15.85 Quarts, or 4 Gallons of fluid!
