THE NORTON NO-RISK TEST POLICY

Norton/Saint-Gobain is so confident of the superior performance of our abrasive products, as recommended for specific applications, that we invite in-plant tests against any other brand of abrasive product on the market.

- 1 The test will be conducted in the user's own plant, on their own machines, using their own workpieces.
- 2 Even if the user purchases only a minimum quantity of Norton abrasive products, the user will receive the same quantity discount as would apply to their normal production orders.
- 3 If the Norton product tested proves completely unsatisfactory, the user will receive a full refund.
- 4 If the Norton product tested performs at a lower level than the product presently in production, the user will receive an adjustment to make up the difference in performance.
- 5 The user is the final judge of performance!
